

I am appalled by the Sinclair Broadcasting Company's plan to overtly subvert the democratic process by attempting to use its political influence and wealth to sabotage the cornerstone of our democracy, our election process. Whether a news media would present a "documentary" true or not, on the activities of a 23 year old, whether in military service or military avoidance and alcoholism, 35 years after these situations took place, can in no way be considered news. This can only be considered as what it is, an attempt to use power and wealth to trump the one person one vote of our country's citizens through use of purchased political power and corruption.

Our democracy and our right to have a fair say in it is very important to me and I deeply resent anyone's unfair and unethical attempt to trump mine or any other citizens vote. The citizens of our country deserve to have a media that provides the checks and balances on our governments activities in order to insure the health and continuance of our democracy and we deserve a media regulatory agency who is dedicated to that principle, not the practice of partisan politics. Sinclairs activities not only run contrary to this but are a shameless display of what can only be interpreted as abusive power and corruption. For the FCC to not take action to prevent this assault on our democracy would make that agency complicit in this anti-democratic and anti-American activity.

I sincerely hope that your agency will live up to its responsibility. Thank you.
